## Summary

I am a 20-year-old student at the Gerardo Barrios University, where I am currently completing the seventh cycle of Computer Systems and Network Engineering. In addition to my academic dedication, I like to explore new technologies for my performance as a professional. I identify myself as a happy, fun, hard-working person, dedicated to my career. I enjoy spending time with my family and friends who inspire me to follow my goals and objectives with determination to be a successful professional, my goal is to specialize in cybersecurity and lead software development teams to contribute to innovative technological solutions. I have skills such as analysis, which allows me to effectively evaluate objectives and proposals in the development of a project. academically, I am committed to my growth both in my skills and professionally and academically.
